

Product Specification Sheet

Citymax Telephone

The Citymax slimline telephones are surface mounted and manufactured from high impact ABS plastic, with polished mirror finish, for easy cleaning. They include a lock release button, which works without picking the handset up, several securing points, electret microphone and coiled cable BT type plug in handset and telephone for the easy connection.

Telephones are electronic call. Only the Universal types are compatible with buzzer systems.

Depending on the selected entry panel system (4+1 and 1 + 1: with call wires, or ADS and BUS-2 without call wires) a specific type of telephone will be required. They are not compatible in the same installation.

Depending on functions and design (number of pushbuttons) we can offer:
BASIC: with door release pushbutton.

EXTRA: door release pushbutton and 2 additional function buttons.

COMPLETE: door release pushbutton and 5 additional function buttons.

Somme additional functions can be incorporated in the telephone: release of a second door; panic pushbutton, volume control, special call button to the guard, release of a light or other commands like an alarm, siren, etc. A relay Ref 2013 is required for these functions.

Analogue System (4 + 1)

Ref: 8044 Citymax Basic Telephone (Grey)

Ref 80447 Citymax Basic Telephone (white)

Analogue System (5 + 1)

Ref 8045 Citymax Extra Telephone (Call volume control with LED)

Analogue System (1 + 1)

Ref 50017 Citymax Basic Privacy 1 + 1 telephone (White)

Privacy (The telephone remains disconnected if it has not been called, so if any other apartment picks up its phone, it can not hear any conversation.)

ADS System (BUS 3 wires)

Extra or Complete telephones with additional buttons to call the guard are required for systems with guard unit.

Ref 2451 ADS Basic telephone (Grey)

Ref 24517 ADS Basic telephone (White)

Ref 2452 ADS Extra Telephone (Grey)

Ref 2389 Desktop ADS Basic telephone (Grey)

Accessories for Replacement
